

National Library for Public Health e-Newsletter

August 2009

Welcome to the August edition of the [National Library for Public Health](#) newsletter.

The purpose of this newsletter is to highlight new additions to the library and any special pieces of work we have done.

We hope you find this useful and would welcome any comments. If you would like to be added or removed from our mailing list, please email library@nepho.org.uk. Please note, due to the volume of emails received for subscriptions, you **will not** receive a confirmation.

New look to the National Library for Public Health

We have revamped our front page. It now lists more topic areas where we have extensive public health collections. Further topics are in development, but please note that we have public health pretty well covered so if you don't see the topic you are interested in, try a search! You can also send us feedback about the new look or the content - have you tried to find resources and not found anything? [Visit the new look website](#) and let us know how we are doing.

Public Health Interventions Cost Effectiveness Database (PHICED)

The Public Health Interventions Cost Effectiveness Database (PHICED) is intended to help commissioners who want to know more about the economic and health impacts of public health programmes; alcohol, obesity, physical activity and tobacco. The development of this tool was funded by Health England and forms part of the National Library for Public Health. For further details about the database and to use the database, [visit the PHICED website](#).

Consultations

Consultations on a number of public health topics are currently being run. Further details can be found via the links below.

- [How alcohol is sold and supplied](#) until 5th August
- [Marmot review - strategic review of health inequalities in England post 2010](#) until 5th August
- [Environmental noise and health in the UK](#) until 17th August
- [Health protection regulations](#) until 30th September
- [New horizons: towards a shared vision for mental health](#) until 15th October

The library has been developed to provide high quality evidence e-based information on all aspects of public health.

It is designed for those working in the field of public health by providing a single source of access to web based evidence on public health. It is being developed as part of the Department of Health Information and Intelligence Strategy by the North East Public Health Observatory. It replaces the Public Health Electronic Library (PHeL).

The National Library for Public Health does not contain

Events

For a list of new and upcoming events, please see the [Events section below](#).

patient
information
on
individual
medical
conditions.

New additions

We have highlighted items brand new to the whole of the National Libraries for Health and key items for topics. If you are interested in a full list of items, please visit the [July 2009](#) additions page, otherwise select a topic below for a selection of items. Please note that these links may not work in some email clients.
