'Innovation in Public Health'

The Joint Public Health Annual Conference is hosted by The Centre for Public Health, Queen's University Belfast, The Public Health Agency, The Health Service Executive Ireland, The Institute of Public Health in Ireland, and The Department of Health NI.

This year's conference will focus on innovation in public interventions, design and evaluation. This joint event aims to raise the profile of public health research, interventions and innovation, and engage local professionals, practitioners and researchers working in the broad field of public health. The day will provide an excellent opportunity to network across sectors and disciplines. In addition to the keynote plenary sessions, delegates will have the opportunity to participate in a number of parallel workshops showcasing the innovative approaches that are currently underway across the island of Ireland.
